S9V Feel The Difference Since releasing its first portable color Doppler ultrasound system, SonoScape has dedicated itself to the ultrasound field. From this dedication a great deal of ultrasound technologies especially in hand carried systems has emerged. With focused efforts, S9V is released as a powerful and versatile imaging platform with futuristic design and will provides you the best solution for ultrasound imaging with outstanding performance. Smart: Perform Your Operation, Feel the Difference SonoScape aims to design medical equipment which has incorporated state-of-the-art technologies combining with the optimal workflow. The full-sized touch panel of S9V surpasses the hardware limitation of the traditional keyboard, which enriches the possibility of easier operation. Using S9V, you will get faster operation on a variety of applications, including the most difficult diagnostic tasks. View these programs below, and be inspired to boost your productivity. Stylish: Take Your Premium Performance Anywhere SonoScape S9V offers the highest standard of ergonomics and delivers you the latest technological innovations with highly integrated chip sets, which enables excellent portability and flexibility. Incorporated an intelligent and style-changeable smart touch screen, S9V has set a new standard for ultrasound scanning, which will bring you unprecedented ease-of-use. Proven Technology Spatial Compound Imaging Pulse Inversion Harmonic Imaging C-xlasto Elastography A Multi-Function Power Platform with Innovation Stress Echo High Density Probe User-friendly 13.3" High Resolution Touch Screen Two Transducer Connectors DICOM capability enabling data connection with the Internet Professional veterinary obstetric and cardiology measurement package Our mission is to follow you all the way, supporting your daily workflow and elevating your vet experience through new advanced approaches and technologies. DOWNLOAD Never stop making your VET ultrasound exam easier: smart veterinary solutions with VET-dedicated software and zero-click technology for easy Diagnostics in your everyday practice. DOWNLOAD MyLab™VET LEAFLET Over 30 years of experience in the veterinary field have lead to the development and introduction of specific light-weight, durable transducers to cover a wide range of applications. Ranging from endorectal to linear, (micro)convex and phased array... READ Impressive image quality in all modalities and in a wide range of applications. Besides B-Mode, M-Mode and Doppler-imaging, our ultrasound systems offer multiple advanced technologies to have stunning images within reach.
